SUMMARY

I am a dedicated Frontend Web Developer with a background in Computer Engineering. Proficient in JavaScript, HTML, CSS, TypeScript, and React, I blend technical expertise with creative flair to craft engaging and user-centric web applications. My commitment to clean, maintainable code reflects my engineering background, while my passion for web development drives me to stay abreast of the latest industry trends. I take pride in my ability to create user-friendly interfaces, optimize website performance, and collaborate effectively with cross-functional teams, all while delivering exceptional digital experiences.
